

Vinyl Wrapped Boards Cleaning Care Instructions

We recommend you use only warm water (35°C) with pure soap (such as Sunlight bar soap) and a soft cloth (e.g. micro fibre) to clean.

Do not use abrasive cleaners, strong household cleaners or detergents particularly those containing hydroxide ions or solvents.

As with all high quality furniture finishes care must be used in cleaning and maintenance. Some components and chemicals of strong household cleaning products and detergents are harmful to fine finishes.

To avoid potential damage we advise that strong cleaning products or detergents should be avoided when cleaning.

If the foil comes into contact with any strong cleaning product or detergent, promptly rinse off with warm water ensuring that all residues from the cleaner is removed.

Do not put hot objects onto the vinyl, such as saucepans, pots, dishes or any other item that has come directly from a stove, oven or any other place that has caused the items to become hot.

High temperatures and long exposure to high temperatures will damage the vinyl products.

Do not alter the product or the warranty will be void, i.e. cutting the product may cause other things to comprise the adhesive.
