dwd xp drawer removal instructions

How to correctly remove a DWD XP drawer.

STEP 1 Start with the drawer partially extended.

STEP 2 Apply gentle upward pressure as you begin to fully extend the drawer.

STEP 3 Maintain upward pressure as you reach full extension.

STEP 4 The drawer locking catch will release due to the upward pressure, not the pulling motion.

STEP 5 Remove the drawer from the slides. Always replace the drawer with the slides fully extended.
